### **Friday Tour Bus Schedules**

Board busses at 7:45 am.

Due to the recent sale of the Humboldt mine to Talon Metals, we are not certain we can view the mine as planned. We have several backup plans available.

We'll arrive at the Negaunee Depot by noon. We have the depot booked until 2:00 pm for lunch—we are bringing boxed lunches from the hotel. The freight house next door will be open for tours for us as well during this window. The original scale is still in the floor and the building itself looks very original and elegant inside. If the weather is nice, we are trying to arrange for a couple of local historians to be onsite outside to explain what was where and tell stories as people wander around. Greg Stahl will be doing the same. We will be in the center of what was a spaghetti bowl of tracks for the DSS&A and the CNW, adjacent to many old mines right around us.

At 2:00 pm or sooner we need to leave as another party will be coming to the depot at 3:00 pm. We will head to the LS&I ore dock to see if any boats are loading and check out the U25C on display. We cannot stay long, as it is an hour and a half minimum drive time back to the hotel. That puts us back around 4:30 pm if things go smoothly and we can be at the dock for only 30 minutes.
